Under the agreements, funds were spent on the construction, repair, and reconstruction of social facilities as well as the modernization and maintenance of infrastructure in rural areas.

RUB **3.34** BN

INVESTMENT AS PART OF AGREEMENTS

“Economic cooperation agreements remain the best way to implement major infrastructure projects. However, here we adhere to the principles of investment, not sponsorship. Along with the regional authorities, we study the real needs of the territories. This helps to be sure that every rouble invested is being used for real improvements in the quality of life in the regions”.
